

ATTENDANCE MANAGEMENT SYSTEM

Abstract

This project is a web-based Attendance Management System designed for organizations to efficiently record, manage, and track employee attendance. It consists of an admin module, an employer module and an employee module. The system allows secure user authentication, easy attendance marking, and real-time data storage. The Employers can Modify the attendance of the individual employees. Administrators can view and manage attendance records, while employees can check their own logs. It aims to reduce manual errors, save time, and provide an organized, accessible platform for attendance tracking.

Technologies Used

- Frontend: HTML, CSS, JavaScript
- Backend: Node.js
- Database: MongoDB

Modules Included

- Admin module: Full control
- Employer module: Partial control
- Employee module: Read Only
