ATTENDANCE MANAGEMENT SYSTEM

Abstract

This project is a web-based Attendance Management System designed for organizations to efficiently record, manage, and track student attendance. It consists of an admin module, an staff module and an student module. The system allows secure staff authentication, easy attendance marking, and real-time data storage. The staff can Modify the attendance of the individual students. Administrators can view and manage attendance records, while Students can check their own logs. It aims to reduce manual errors, save time, and provide an organized, accessible platform for attendance tracking.

Technologies Used

- Frontend: HTML, CSS, JavaScript

- Backend: Node.js

- Database: MongoDB

Modules Included

- Admin module: Full control

- Staff module: Partial control

- Student module: Read Only
